Employment

2025.08 – Present

▪ **Shenzhen Hexun Huagu Information Technology Co., Ltd.**
Agent Delivery / Deployment Engineer (FDE)

Partner with enterprise and government stakeholders to map workflows, identify high-value AI use cases, scope solutions, and deliver technical demos, POCs, and production systems.

Education

2023.07 – 2025.07

▪ **Master of Information Technology** The University of Queensland

2019.09 – 2023.06

▪ **Bachelor of International Economics & Trade** Shantou University

Selected Deployments & Projects

2026.07 – 08

▪ **KIVO - AI Visual Creation Platform** FDE · Commercial Delivery

Independently owned the full loop from requirements discovery and product definition through architecture, full-stack development, production deployment, and delivery. Built a multi-user platform for resumable media jobs, factual artifacts, and an editable infinite canvas; adopted for internal company communications and advancing toward a company-level product.

2026.04 – 06

▪ **Intera - Customer-Service Agentic Harness** FDE · Commercial Delivery

Independently owned customer discovery, Harness Agent design, full-stack development, deployment, and delivery as one closed loop. Built a configurable customer-service Harness Agent spanning configuration, Procedures, Tools, Hooks, Memory, Loop, trace evidence, and human handoff; the company later adopted it and introduced a new Loop Agent type for reusable SaaS development.

2025.12 – 2026.03

▪ **IGaming Customer Service Agents** ToB Commercial Delivery

Delivered 24/7 agents for 50+ service scenarios using RAG; supported build, deployment, dialogue optimization, and ongoing operations. Designed dynamic policy retrieval to separate frequently changing business rules from prompts and improve maintainability.

Proposed an Agent Native operating model adopted by the company; helped author SaaS Skills and drive API coverage and instrumentation from build through operations, enabling Agents to replace manual steps and close the SaaS operation loop.

Selected Deployments & Projects (continued)

- | | |
|-------------------|---|
| 2025.11 – 2025.12 | ▪ Housing Fund Conversational Service Assistant ToG Commercial POC
Mapped 20+ public-service workflows into multi-turn Agent flows and built a conversation-plus-card POC for natural-language service completion. Demo |
| 2025.10 – 2025.11 | ▪ Food Poisoning AI Questionnaire ToG Commercial POC
Built an AI-assisted logic-questionnaire and investigation-progress platform; advanced it through competitive POC evaluation. Demo |
| 2025.08 – 2025.09 | ▪ Enterprise Email Automation Platform ToB, Production Deployment
Automated unstructured-email parsing, cleansing, deduplication, and RAG ingestion for customer production. |
| 2024.07 – 2025.04 | ▪ AI Model Modulation with Logits Redistribution Research
Co-authored retraining-free model-behavior modulation research published at ACM Web Conference 2025. DOI |

Skills

- | | |
|-------------|--|
| AI Systems | ▪ Agent workflows, agent harness design and implementation, RAG, tool calling, context and state management, prompt engineering, evaluation and tracing, guardrails, human handoff |
| Engineering | ▪ Python, TypeScript/JavaScript, React, Next.js, Vite, Node.js, SQL, PostgreSQL, REST APIs, PyTorch, Git |
| Delivery | ▪ Customer discovery, solution scoping, technical pre-sales, demos, POCs, ToB/ToG deployment |
| Languages | ▪ PTE Academic · IELTS 7 equivalent across all four skills |

FDE Profile

- | | |
|--------------------------|--|
| Customer-facing Delivery | ▪ Translate ambiguous enterprise and government workflows into scoped, working AI systems through discovery, technical pre-sales, demos, POCs, and production rollout. |
| Hands-on Execution | ▪ Build and operate agent workflows across RAG, tool integration, context design, evaluation, tracing, and human handoff; independently owned KIVO and Intera from discovery and scope through full-stack development, deployment, and delivery. |
