Employment

- 2025.08 – Present ■ **Enterprise AI Solutions Company AI Agent Pre-sales & Delivery Engineer**
Partner with enterprise and government stakeholders to map workflows, identify high-value AI use cases, scope solutions, and deliver technical demos, POCs, and production deployments. Own delivery across customer service, public services, public health, and enterprise knowledge workflows, covering agent design, RAG and tool integration, testing, rollout, operations, and iteration.

Education

- 2023.07 – 2025.07 ■ **Master of Information Technology** The University of Queensland
2019.09 – 2023.06 ■ **Bachelor of International Economics & Trade** Shantou University

Selected Deployments & Projects

- 2026 ■ **Intera - Self-hosted Customer-Service AgentOps** Independent Product
Built a control plane spanning agent configuration, Procedures, Tools, Hooks, scenarios, release, trace evidence, and durable human handoff using Next.js, TypeScript, Prisma, and PostgreSQL. Case study
- 2025.12 – 2026.03 ■ **IGaming Customer Service Agents** ToB Commercial Delivery
Delivered 24/7 agents for 10+ service scenarios using RAG and tool calling; supported build, deployment, dialogue optimization, and ongoing operations. Designed dynamic policy retrieval to separate frequently changing business rules from prompts and improve maintainability.
- 2025.11 – 2025.12 ■ **Housing Fund Conversational Service Assistant** ToG, Phase 1 Deployed
Mapped 20+ public-service workflows into multi-turn agent flows. Designed a conversation-plus-card interaction and built a working POC for complex service completion through natural language. Demo
- 2025.10 – 2025.11 ■ **Food Poisoning AI Questionnaire** ToG Commercial POC
Independently built an AI-assisted platform for logic-based questionnaire generation and investigation-progress analysis; advanced it through a competitive POC evaluation based on workflow fit and product clarity. Demo

Selected Deployments & Projects (continued)

- 2025.08 – 2025.09 ■ **Enterprise Email Automation Platform** ToB, Production Deployment
Built an automated loop for parsing unstructured email, cleaning and deduplicating records, and ingesting curated content into a RAG knowledge base; delivered it into a customer production environment.
- 2024.07 – 2025.04 ■ **AI Model Modulation with Logits Redistribution** Research
Co-authored research on adjusting model behavior without retraining, published at the ACM Web Conference 2025. DOI

Skills

- AI Systems ■ Agent workflows, agent harness design and implementation, RAG, tool calling, context and state management, prompt engineering, evaluation and tracing, guardrails, human handoff
- Engineering ■ Python, TypeScript/JavaScript, Next.js, SQL, PostgreSQL, REST APIs, PyTorch, Git
- Delivery ■ Customer discovery, solution scoping, technical pre-sales, demos, POCs, ToB/ToG deployment
- Languages ■ PTE Academic (all skills at IELTS 7 equivalent), IELTS 6.5, CET-6

FDE Profile

- Customer-facing Delivery ■ Translate ambiguous enterprise and government workflows into scoped, working AI systems through discovery, technical pre-sales, demos, POCs, and production rollout.
- Hands-on Execution ■ Build and operate agent workflows across RAG, tool integration, context design, evaluation, tracing, and human handoff; independently shipped both customer deployments and the Intera AgentOps product.
- Cross-functional Edge ■ Combine an information technology master's degree with business training and customer-facing delivery experience; co-authored an ACM Web Conference 2025 paper.
