

ZHIYANG MEI

magicyoung63@yahoo.com | +61 403813564 | Brisbane, QLD 4000

Education

The University of Queensland | Brisbane, Australia | Expected in 07/2025

Master of Science: Information Technology

- **Representative Courses:** Advanced Software Engineering, Discrete Mathematics, Artificial Intelligence, Web Information Systems, Human-Computer Interaction, Advanced Database Systems
- **GPA:** 6.1 / 7

Shantou University | Shantou, China | 06/2023

Bachelor of Arts: International Economics And Trade

- **Representative Courses:** Calculus, Econometrics, Project Management, Python Data Analysis, Linear Algebra, Intermediate Macroeconomics, Intermediate Microeconomics
- **GPA:** 3.13 / 4

Project Experience

Front End Developer | GreenGo | 07/2024 - 12/2025

- Web application for Brisbane cyclists that offers route discovery, event listings, user reviews and community interaction.
- Visualised cycling routes with **Leaflet.js** and added advanced path filters for an engaging UX.
- Integrated **Google OAuth** for secure, one-click sign-in and account management.
- Delivered key modules—route recommendations, location mapping, user comments—fully responsive on mobile.
- Automatically pulled cycling routes and event data from Brisbane City Council's open datasets.
- **Tech stack:** jQuery, Font Awesome, Google OAuth
- **Repository:** <https://github.com/CurtisYoung18/GreenGo>

Full Stack Web Developer | Gowalla Explorer | 02/2025 - 05/2025

- Interactive platform for the global **Gowalla** check-in dataset supporting trajectory visualisation, spatial queries, personalised search, POI heat-map analysis and an AI assistant.
- Delivered spatio-temporal track queries, similar-trajectory retrieval, hot-spot aggregation and export of tracks/POIs.
- Designed a RESTful API enabling efficient geospatial search, pagination and aggregation.
- Built map and UI modules with **Leaflet.js** (WebGL accelerated).
- Added an AI chatbot to handle natural-language questions and feature guidance.
- **Tech stack:** Node.js, Express, PostgreSQL, PostGIS, Leaflet.js, WebGL
- **Repository:** <https://github.com/CurtisYoung18/Gowalla-Explorer>

Research Assistant | AI Model Modulation with Logits Redistribution | 07/2024 - 04/2025

- Proposed a lightweight intervention on neural-network logits that tunes model behaviour and amplifies class-specific features **without retraining**.
- Applicable to image classification, semantic segmentation and NLP; ideal for tiered AI APIs and autonomous-driving scenarios.
- Enables real-time, user-specific model adjustment while cutting DevOps costs and increasing model reusability.
- Findings accepted at the **ACM Web Conference (WWW 2025)**.

- **Tech stack:** SegFormer, Python, PyTorch
- **Repository:** <https://github.com/UQ-Trust-Lab/AIM>
- **DOI:** 10.1145/3696410.3714737

Researcher | Reinforcement-Learning Applications | 07/2024 - 12/2024

- Implemented and optimised multiple Deep Q-Network (DQN) variants, including vanilla DQN and Dueling DQN, on **OpenAI Gym** tasks (CartPole, LunarLander, etc.).
- Coded core RL algorithms from scratch in **Python/PyTorch**—experience replay, target networks, soft updates and ϵ -greedy exploration.
- Automated training-progress visualisation; results can be saved for post-analysis.
- Delivered a one-stop experimental platform for cross-environment and cross-architecture benchmarking.
- **Tech stack:** Python, PyTorch, OpenAI Gym, Anaconda, Matplotlib
- **Repository:** <https://github.com/CurtisYoung18/RL-DQN>

Front End Developer | Community Tournament Commentator Scheduling System | 01/2024 - 05/2024

- H5-based system enabling commentators to browse match slots, submit applications and arrange collaborations.
- Built with **Vue 3 + TypeScript**, adopting OOP principles for a clean, extensible purchase-flow design.
- Added lazy loading and pull-to-refresh for match lists, improving mobile performance.
- Enabled commentator invitations as well as one-click submission of intent forms.
- **Tech stack:** Vue 3, Naive UI, Pinia, Vue Router 4, SCSS, TypeScript
- **Repository:** https://github.com/handsomeSpring/commentary_v2
- **Demo:** <https://commentary.idvasg.cn/#/>

Full Stack Web Developer | ScanMe | 02/2024 - 04/2024

- Designed and built an end-to-end online QR-code ordering platform on **CodeIgniter 4**.
- Implemented fast generation of multiple QR-code types (generic and menu-specific).
- Synchronized back-office menu data so that front-end displays always matched the database.
- Streamlined data-transfer routines to boost response speed and system reliability.
- **Tech stack:** HTML/CSS/JavaScript, PHP, MySQL
- **Repository:** https://github.com/CurtisYoung18/Scan_Me

Skills

- **Programming / Frameworks:** Python, Java, PHP, JavaScript, Vue ecosystem, Node.js, Git, PyTorch
- **Data & Databases:** MySQL, PostgreSQL, PostGIS, Redis, HDFS
- **Tools:** LaTeX, Microsoft Office, WebGL, Leaflet.js

Personal Summary

- Experienced in team building, project coordination, and cross-functional communication.
- Quick learner with strong analytical abilities; proactive, detail-oriented, and accountable.
- Hard-working, resilient, and eager to tackle new challenges with a strong sense of social responsibility
- Personal Website: <https://curtisyoung18.github.io>
